

Engineers and Technicians

- Are you the parent of a Primary School Child?
- Are you working Part-time or on a career break?
- Are you working in a different profession now?

If you, or someone you know, fits the bill
The School Gate SET would like to hear from you!

Could you help inspire the next generation of Scientists and Engineers?

The School Gate SET is an online community for parents with a background in Science, Technology, Engineering or Maths (STEM) who want to volunteer their time and expertise in their children's school.

The School Gate SET parents support STEM teaching and learning in their children's schools by:

- Running after-school / lunchtime science and computing clubs
- Suggesting / delivering activities to enhance the STEM curriculum

The School Gate SET offers:

- **FREE** professional development workshops for parent volunteers - funded by the Royal Academy of Engineering.
- An online network to share ideas and experiences
